

Schedule your Home Performance assessment and find out where the money is escaping from your home.

#### AIR SEALING

We check for air sealing opportunities.

Sealing air leaks will reduce energy loss and make your home more comfortable.

#### CO TEST

We check for carbon monoxide.

Health and safety is a critical component. A carbon monoxide (CO) analyzer is used to check combustion appliances (stoves, furnaces, and water heaters) for carbon monoxide levels.

“We were impressed by the cash incentives and the striking difference that some simple changes made. The improved insulation, air sealing, and duct sealing eliminated the drafts in our home.”

—Gene Zimmermann, Washington, NJ

Call **866-923-2653** or visit **NJCleanEnergy.com** for more information about “whole-house” solutions.

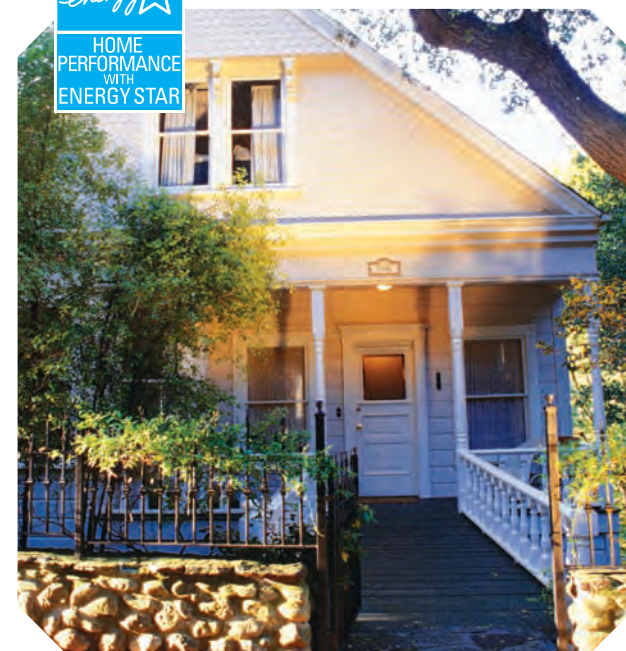

The Building Performance Institute (BPI) is the national resource for building science-based certification and accreditation standards. All contractors in New Jersey participating in *Home Performance with ENERGY STAR* are required to be accredited by BPI.

New Jersey's *Home Performance with ENERGY STAR* program is brought to you by the New Jersey Board of Public Utilities and *New Jersey's Clean Energy Program*.

# Home Performance with ENERGY STAR®

Save up to 30% on your energy costs.

*Home Performance with ENERGY STAR* is your “whole-house” solution for a more energy efficient, comfortable home. Rebates are now available to more New Jersey residents!

# It's amazing how comfortable and energy efficient your home could be with our "whole-house" solution.

Did you know that up to 60% of energy used to heat and cool homes is wasted due to leaky ducts, inefficient equipment, poor insulation, and air leaks?

## **1 Equipment Replacement for Heating Systems and Central Air Conditioning**

If your home's heating and cooling equipment is more than 10 years old, it may be time for a high efficiency replacement.

## **2 Insulation and Air Sealing**

Upgrading insulation levels and sealing up cracks, gaps, and holes can reduce your home's heating and cooling costs.

## **3 Sealing Up Ducts**

Insulating and sealing cracked or disconnected ducts helps distribute air more evenly and efficiently and keeps your home cool and comfortable.

## **About Home Performance with ENERGY STAR**

*Home Performance with ENERGY STAR*, brought to you by the New Jersey Board of Public Utilities and *New Jersey's Clean Energy Program*,™ is a whole new approach to home improvements:

- Reduces energy costs by up to 30%
- Increases comfort and durability
- Helps reduce your carbon footprint
- Provides you greater peace of mind and confidence—only contractors certified and accredited by the Building Performance Institute (BPI) can be a part of *Home Performance with ENERGY STAR*

Single-family and low-rise multifamily homes are eligible to participate.

This **nationally acclaimed home improvement program** uses the best of home testing, techniques and upgrades to increase your home's energy performance, comfort, health and safety. Using a **"whole-house"** approach, specially trained and certified technicians assess your home from top to bottom, looking at the following components:

- Heating/cooling equipment
- Insulation levels
- Air sealing opportunities

Following your assessment you will receive a list of recommended measures to improve the energy efficiency of your home. **Low-interest financing or cash incentives are available\*** to help get the work done and help you save even more. All the work is done for you by accredited contractors who "test in and test out" to make sure your home is operating efficiently, safely, and comfortably.

Incentives are higher than ever before - don't miss out!

- Low-interest financing and/or cash back options are available to help you pay for the improvement work.
- Additional assistance may be available if homeowners meet certain income eligibility requirements.
- As a result of federal stimulus funding, New Jersey homeowners who heat their homes with oil or propane, and customers of municipal electric utilities are now eligible for incentives from *New Jersey's Clean Energy Program*. Ask for a Home Performance contractor that performs American Reinvestment Recovery Act (ARRA) projects.

*"After our Home Performance with ENERGY STAR contractor insulated our home, we've noticed increased comfort and less outside noise coming into the house. Plus, our electric and heating bills have gone down."*

\* Restrictions apply.
